Plenty of Bull News in Wheat, but It Did Not Send Prices Up Very Much-December Oats Take a Tumble.

Chicago, Nov. 19 .- There was enough bullish news in wheat to-day to have advanc-ed the price 3c per bushel, but the close

the news in wheat to-day to have advanced the price 3c per bushel, but the close showed gains of only \$\% \text{ for December and \$\frac{4}{2}\% \text{ for May}\$. Top prices were made on the announcement of French purchases of 1.50,000 bushels of wheat off coast at London. Corn was slow and closed \$\frac{4}{2}\% \text{ for December, but unchanged for May. There was an irregular market in oats, December declining \$\frac{4}{2}\% \text{ can May was unchanged. The Liverpool estimates from the Russian minister crop estimates from the Russian minister. The effect of this was somewhat spolled by another report which gave the shortage at 10,000,000 bushels for the whole empire. The heaviness of the Northwest receipts also had a tendency to keep the market back. The latter, in fact, was the only strongly bearish feature of the day's trading, Opening prices for May ranged from \$\frac{90}{2}\epsilon \frac{90}{2}\epsilon \frac{90}{2 Another bearish item of news was that a cargo of American wheat had been reshipped at Buenos Ayres because Argentine expected to have plenty of her own. Primary Western receipts were large again, 1.154,000 bushels, compared with 674,000 a year ago. Liverpool closed higher by from 114d to 114d than it closed the day before. The reason given for such an unexpectedly heavy advance was that 1,500,000 bushels of wheat destined for ports of call off coast in the United Kingdom had been ordered to France. Even with this as an incentive, the price of May went up very unwillingly. It finally advanced to 914c, but when the Modern Miller report was received declaring the wheat area up to the average and promising an increase, the price went off again in a hurry. May was selling at 904 690%c at the close.

Corn was dull, the exertion of the previous two days having apparently taken all the life out of traders. Business consisted chiefly of changing from December to May at 334334c spread. The market was fairly steady, helped by the early firmness of wheat and oats and the moderate receipts. 234 cars. Beaboard clearances were \$5,000 bushels. Cables were 1434d higher. May ranged from 2062094c to 225c, and closed unchanged at 2254c.

The crowd in oats was large all day, and a nervous feeling existed throughout the session. At the opening, and for a time after, there was heavy buying by the people who were so prominent on the buying side. Later they turned, and sold heavily of December, and the spread, which had narrowed to 3cc, widened to 1c. The switching was so continuous that traders became somewhat bewildered. The heavy selling in December, however, resulted in a 5cc decline in that option, Cash demand continued urgent and sales of 250,000 bushels were reported. Receipts were 301 cars. May ranged from 2256225c to 2246225c, closing unchanged at 225c.

Provisions were again very dull. The market was barely steady, with the range of prices less than 5c in everything. Hog receipts overran estimates, which may account for the e

Dry Goods.

New York, Nov. 19.—Dry goods are following the lines of the week's trading, and show no increase in interest in any grade. Dealers are of the opinion that there can be no radical change in the situation until there has been a decided improvement in the weather, in the way of more seasonable conditions. At present mail orders are light and store trading is limited and conservative. In woolens and worsted goods the demand is restricted to slight reorders. Jobbers are conducting a campaign of concessions on various different lines of goods, and in this way are obtaining control of a vast number of orders at exceedingly irregular prices; they neither mar nor help the situation to any appreciable extent. Collections are very fair. In staple cottons the demand for both brown and bleached goods is quite limited, and is without feature in any grade. In brown and bleached goods is quite limited, and is without feature in any grade. In print cloths the trading of the week has been small. Bids of 2%c for extra are steadily refused by manufacturers, and there is practically no demand for these goods at the nominal quotation of 25-16c. Odd goods are exceedingly quiet in all grades.

Coffee and Sugar.

New York, Nov. 19.—COFFEE—Options opened barely steady at a decline of 5210 points, ruled slow with a weak undertone, European cables being unfavorable, receipts at Rio and Santos heavy and spot buyers procrastinating; closed quiet at a net loss of 5210 points; sales, 22,250 bags, including December, 5.25c, and March, 5.55c. COUNTRY DEMAND FOR FEEDING CATTLE CONTINUES UNABATED.

Feeders Being Sought for Everywhere-Big Shipment Here From Alabama-Col. McCoy Reappointed Inspector.

Notwithstanding many feeders in this section are getting cattle previously con-tracted for, there is no abatement in the demand here for cattle to go back to the country to be fed. Thursday's shipments reached 212 cars. That has been exceeded only twice before this year—on September 25, when 226 were sent out, and August 25, when 222 went to the country. The scarcity and high price of young cat-

the in the West are causing buyers to reach out and enter new fields for them this sea-sen. Even Alabama is now sending cattle to this section. No less than fourteen cars of feeders from there passed through here yesterday for Holt county, Mo., consigned to Minton Bros. The announcement yesterday that Colonel J. G. McCoy is to be reappointed cattle inspector here for Kansas next season gavo general satisfaction at the yards, as he is thought to be the right man for the office, and has the confidence and esteem of all in the trade,

One of the prettiest bunches of cattle here for some days was brought in yesterday by J. O. Brown, of Whiting, Kas. It was a bunch of twenty-four 2-year-old Storthorn steers of his own raising and feeding. They were a smooth and nhely fatted set of youngsters and attracted general attention. They averaged 1,572 pounds and were sold by White, Cowgill & Acwilliams at \$4.85, the highest price of the day. Swift & Co. took them for their dressed beef trade.

There have been a number of Southern cattle sold here since the raising of the quarantine to go to Kansas feed lots. T. A. Coleman, San Antonio, Tex., has sold to Fred Koster, Cloud county, Kas., for immediate delivery 1,30 2 and 3-year-old Texas steers. P. T. & W. H. Jennings. of San Antonio, Tex., has sold to Chase Eros. & Root, of Morris county, Kas., 130 2 and 3-year-old Texas steers for December delivery. T. E. Ladd has again returned to work after an enforced idleness of some months. He looks well and says he feels better than for some years and has gained afteen pounds in weight.

S. Carlin, the well known stockman of Salina, Kas., has associated himself with McDonald & Blair in the commission busi-ness and the firm is now Carlin, McDonald & Blair.

There were several new mule buyers up yesterday from the South, E. A. Hills, New Iberia, La., and A. L. McGee, Birmingham, Ala. They will both take out shipments next week.

Wheat Supply vs. Demand.

ranges. Wheat Supply vs. Demand.

Mesers. Irwin, Green & Co., of Chicago, in their weekly letter say: "As bearing on the problem of supply versus demand in the future for the next few months, we may note that all the wheat now in Duluth is reported to be sold, either for export or for removal to Chicago, that the mills of Minreapolis alone will require before another harvest in the Northwest a quantity of wheat about equal to the present visible supply, that vastly more wheat than is now at the seaboard is understood to have been sold for export, and that we may look for an important reduction in the volume of seiling from first hands almost at any moment. As for the latter, it may be set down as certain that the recent rate cannot be kept up much longer. The farmers have parted with a far greater proportion of their crop than is usual at this date, and it is pretty well known that they had practically no reserves at the beginning of this crop year, stocks on the farm being worked down last July about as near to zero as ever was known, while it goes without saying that visible stocks were unprecedentedly small, if taken as per capita of the population. It needs not to try to figure up how many bushels we raised this year. Nobody knows that, and nobody will ever know it, to within 5 or perhaps 10 per cent of the truth. But a survey of the facta so far as can be ascertained points irreiritibly to the conclusion that already we have parted with nearly as much as we have to spare, and that the demand of the next few months will bring out the fact that we will then have sold more than was prudent. It may emphasize the remark, quoted in a city paper yesterday, that 'an experting country is much more apt to oversell than an importing country is to overbuy.'"
